

# Insights into the SBB Online Timetable

**Speaker: Renato Loeffel, Zühlke Engineering, Bern**

## **Abstract:**

The SBB online timetable is one of the most visited website in Switzerland. Every day it delivers thousands of timetable responses at an incredible speed. Even for a very long journey the possible connections are calculated very quickly. But how does that system work? What are the criteria used for the calculation? Do I really get the best connections?

## **Bio:**

Renato Loeffel is a former student of the University of Fribourg. After his studies he began his career at the SBB where he worked for the timetable planning system. Some years later he switched to Zühlke Engineering where he has worked in several projects. In his current project he develops a new ticketing system for the public transport in Switzerland.

Date and time: Monday, 10<sup>th</sup> November 2014, 5:15 pm – 6:00 pm  
Location: Pérolles II, Room G230, Bd de Pérolles 90, Fribourg  
Contact person: Dr. Andreas Humm
